Specification

1. The abstract of the disclosure is objected to because of the use of the legal term "means" on line 3. Correction is required. See MPEP § 608.01(b).

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the vibrating assembly of claim 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 7 and claim 8, line 6, “may be” renders the claim indefinite as it is unclear if the bag is required to be emptied in order to meet the claimed limitations.

4. Note, in claim 4, line 1, it appears that “bad” should be “bag”.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4-10 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutchins.

Hutchins shows a bulk bag 101; bottom 109; wall 105-108; discharge opening 113; fastening means 127 being a ring; fastening means 114 being a flap; cylindrical tube with a circular spout seen in Figure 4b (a portion of the tube is cylindrical towards the opening); frame 135; support 134 (the 4 rods are the two supports and their extensions); and wheels 147.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3754

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hutchins.

Hutchins has been discussed above, but lacks the vibrator assembly. Hutchins discusses in column 1, lines 47-49, that such vibrator assemblies are known in the art to assist in dispensing the material. It would have been obvious to one of ordinary skill in the art to provide a vibrator assembly on the device of Hutchins if additional means were necessary to break-up clogged material in the bag.

10. Claims 3 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hutchins in view of Derby et al.

Hutchins has been discussed above, but lacks the liner for the bag. Derby et al. teaches the use of a liner 74 for a flexible bag. It would have been obvious to one of ordinary skill in the art to provide a liner as taught by Derby et al. on the device of

Art Unit: 3754

Hutchins in order to dispense materials that might leak out of a mesh bag, i.e.

"foodstuffs, fine powdered materials, or moist materials" (Derby et al., column 5, lines 31-34).

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Natrass, Christine et al., Bonerb, Dibble et al., Hildreth and Becker et al. show other flexible discharge containers with spouts.
